

## Enhancement Release – Active Loads Widget and Greater Performance

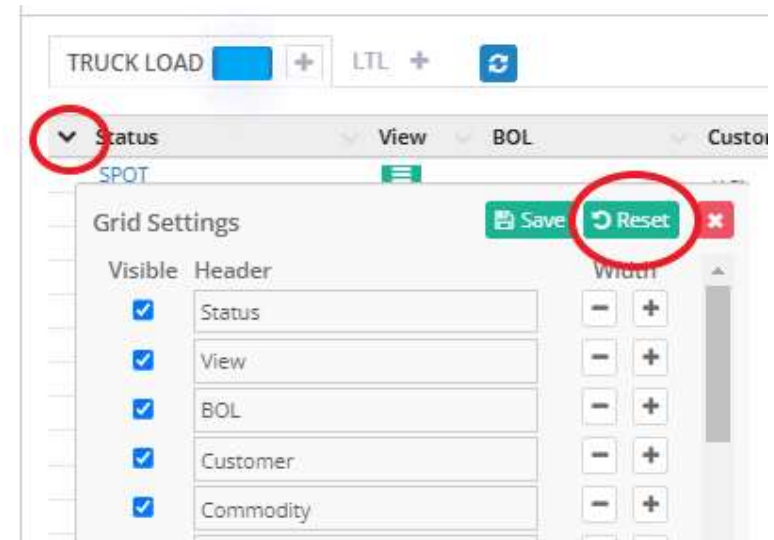

Port TMS is excited to announce these two enhancements that will M5 your business, **M**ove **M**ore Loads and **M**ake **M**ore **M**oney.

The enhancements are scheduled to be released the evening of February 18, 2022. Please contact us at [support@porttms.com](mailto:support@porttms.com) with any questions.

1. Now your Active Load Widget will allow additional customizations to view what is important to you plus setting the width of the column. See below for more details.
2. Greater Performance
  - It's all about the cache, by leveraging sophisticated caching technology, Port has improved the performance of the Active Loads Widget load time. Get ready to M5 your business.

- **Grid Settings** allows you to make the following customizations

- Make columns visible or not visible
- Change the name of a column header
- Adjust the width of a column
- Select '**Save**' after making any changes
- Select '**Reset**' to restore original Grid Settings

- **Header Settings** allows you to make the following customizations

- Add a text filter
- Reorder the columns
- Adjust the column width
- Set an ascending or descending sort
